

**FIRE DAMAGE RESTORATION**

# Use Polygon for an Integrated Solution to Fire Recovery

**Property Damage Restoration**

**Temporary Humidity Control**

**Property Performance Services**

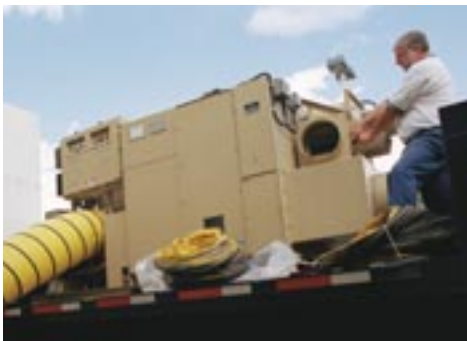

**FIRE DAMAGE RESTORATION**

## Overview

When you call Polygon, a former Munters company, after fire damage, you get a coordinated effort to control your loss and minimize your recovery costs. The professionals at Polygon will quickly assess your fire damage problem, integrate all necessary services and quickly bring the required staff and equipment to the job site. With Polygon on the job, there is no time wasted, no confusion resulting from multiple companies unwilling or unprepared to cooperate. Our fire recovery service can save you time and money. However, if some reconstruction is necessary, we can help prepare your site and aid in the coordination of that effort.

With more than 20 years of experience and more than 20 company-owned offices in North America and the largest fleet of recovery equipment in the world, Polygon is prepared and has the knowledge to successfully handle your fire recovery.

After fires, Polygon responds quickly with comprehensive restoration services and recovery project management. Above, a Polygon dehumidifier powered by an auxiliary generator is moved into place to begin drying at a fire damaged building, while debris removal and pack-out are already underway. With the largest fleet of recovery equipment in the world, Polygon will shorten your recovery time and limit your loss after a fire.

## Start Your Recovery Fast

Polygon is ready around the clock for your call. We can provide water extraction immediately, even while we are helping you assess the extent of your damage. With the largest fleet of dehumidification equipment in the world, Polygon can provide the right drying system for your project and have it up and running just hours after your call. Polygon has staff that can begin debris removal as soon as the building is safe. With Polygon helping, you can stabilize the damaged building and be on the way to recovery quickly after the disaster strikes.

## Polygon Can Handle All Aspects of Your Recovery

Once the job site is stabilized, Polygon can continue with the restoration work. Initial efforts will be made to clean smoke residue from surfaces and deodorize rooms. Sanitizing and disinfecting will prevent the growth of mold and other pathogens. Sanitizing will be enhanced by deeply drying building cavities to prevent future mold growth. If needed, Polygon will pursue controlled demolition to remove unrestorable materials and make way for reconstruction activities.

FIRE DAMAGE  
RESTORATION

# Polygon Controls Costs and Reduces Business Interruption After Fire Damage

## Corrosion Control and Special Activities After Fire

The combination of the water used to extinguish the fire and chemicals released by the fire, can lead to extensive damage of electronic and mechanical systems in a building. As well, building HVAC systems and duct work are extremely vulnerable to contamination as smoke travels through them during the fire. Polygon will use a variety of proven cleaning and preservation techniques to both prevent corrosion and to clean and preserve mechanicals until the building can be returned to normal use. Likewise, valuable computers and manufacturing equipment may also be damaged from the direct or residual effects of moisture and acidic contaminants. Polygon will take measures necessary to preserve and protect such installations, saving thousands of dollars.

## Contents and Document Protection and Management

Polygon will see that objects inside the building are not further damaged after a fire by ambient conditions such as high humidity, uncontrolled temperatures, and acidic residue. It will also manage the recovery of documents, including on-site and off-site drying, cleaning and soot

Above, Polygon brings a state-of-the-art dehumidifier to a fire recovery site. Wet, smoke-damaged documents are carefully inventoried and stabilized in preparation for drying and cleaning.

restoration of books, files, tape and other media as required. Contents will be moved or repositioned to avoid future damage, and then returned to normal use as the recovery allows.

## 24-Hour Service

Because you never know when a fire will occur, Polygon is ready around the clock. We can be reached by calling 1-800-422-6379. Call us any time with your fire recovery emergency. We are trained to help you evaluate your situation and to provide the guidance and expertise to successfully recover your loss.

## THE POLYGON ADVANTAGE

Use Polygon to control losses and minimize damage after fires. Polygon provides the fastest recovery at the lowest possible cost. Polygon will provide:

- Experienced management for your entire project
- Temporary power so work may begin quickly
- Water extraction services
- Smoke and soot (carbon) removal
- Controlled demolition
- Cleaning and debris removal
- Deodorization
- Contents management
- HVAC and mechanical system reclamation
- Electronics restoration
- Corrosion control
- Ambient air treatment

Left, Polygon provides controlled demolition, removing unsalvageable drywall, allowing dry air to reach into wall cavities. Soot, smoke damage and odors are treated, preparing the building to be safely reoccupied.
