

WATER DAMAGE RESTORATION

Control Costs and Speed Recovery After Water Damage

WATER DAMAGE RESTORATION SERVICES

Property Damage Restoration

Temporary Humidity Control

Property Performance Services

Overview

When you use Polygon, a former Munters company, after water damage, you limit your loss, recover faster and prevent long-term problems, such as mold/ microbiological growth or structural deterioration.

Our drying service is specialized. It requires an understanding of the physical properties of the materials to be dried. It requires special instrumentation to determine the extent of the water damage and the moisture content of the affected objects.

It requires high-tech dehumidifiers and other drying equipment. Most of all, it requires a substantial body of experience coupled with professional techniques. It is a grave mistake to assume that effective drying can be accomplished as an “add-on” service by an inexperienced contractor. From a long-term perspective, drying thoroughly can be the most important part of a disaster recovery.

Get the Facts and Avoid Problems Later

Calling Polygon for a free assessment of a water damage problem will permit you to make recovery decisions based on fact, not supposition. We use instrumentation to measure the moisture content of water damaged materials. We show you how serious your damage is, documenting the location of moisture that must be removed. Our experts discuss specific methods of correcting water damage, and estimate recovery time. We give a quotation which clearly explains procedures and cost.

Inhibit Mold Growth

Studies have shown that buildings dried effectively immediately after flooding have benefitted significantly from a lower level of pathogenic growth. Mold and bacteria, as well as other allergens, all prosper where dampness exists for even a short period of time. With today’s concern for indoor air quality, Polygon becomes an important ally in the healthful restoration of a building. The EPA remediation guidelines indicate that, “Moisture control is the key to mold control.”

Polygon has vast experience in restoring wood floors, drying complicated or unique building structure, and preserving valued documents, media and film records after water damage. In business since 1984, Polygon is the most knowledgeable and experienced company of its kind.

Polygon Controls Costs and Reduces Business Interruption After Water Damage

Polygon has Led the Water Damage Recovery Business for Over 20 Years

Polygon founded the water damage drying business in North America over two decades ago as specialists in the emerging field of water damage drying. Since then, using desiccant drying technology, we have successfully dried tens of thousands of water damaged environments. Polygon has proven time and again that drying, instead of replacing, water damaged interiors can cut recovery costs up to 70%, while reducing business interruption significantly. Insurers and owners alike see enormous advantage offered through Polygon's drying technologies. Today, Polygon is the most experienced water damage recovery company in the world.

THE POLYGON ADVANTAGE

Use Polygon to control costs after water damage. By completely drying water damaged structure and contents you are able to:

- Reduce major reconstruction
- Limit mold growth potential
- Cut replacement/reconstruction cost
- Reduce business interruption
- Preserve building support structure
- Protect unflooded areas from humidity
- Save contents, wallcoverings, carpet, furniture
- Minimize damage to files, documents, books
- Preserve building utilities/systems
- Stabilize computers and electronics
- Save wood floors

Use Polygon for Any Size Project

Polygon is equipped to handle any size job. While Polygon is widely known for its response to major water damage emergencies, almost 90% of our business comes from small, local water damage situations in office buildings, businesses, warehouses, schools and retail centers. Our network of 20+ company-owned offices across North America means we can respond cost-effectively to any water emergency, large or small.

Polygon has 20+ company-owned offices and the largest fleet of drying equipment in North America. We can respond fast to any water damage emergency and we have trained professionals ready to assist you in mitigating your water damage loss. Call Polygon for any size water damage project.

24-Hour Service

Because you never know when water damage will occur, Polygon is ready around-the-clock. You can reach Polygon by calling our Customer Support Center at 1-800-422-6379. Call us any time with your water damage emergency.
